

# EMERGENCY MANAGEMENT, BAS

## Program Code: Emergency Management-BAS

This program can be completed 100% online.

### Program Description

The Bachelor of Applied Science in Emergency Management provides students with a well-rounded foundation in the history, politics, defense and preparedness aspects of terrorism. It will also provide students with the management principles of planning, mitigation, response and recovery from natural and man made disasters in emergency management roles. Graduates of the program will be able to conduct planning analysis, write, and implement emergency plans for public and private entities while addressing the issues of homeland security within the emergency management role. Emergency management and homeland security is one of the fastest growing disciplines in the United States today with excellent employment prospects for graduates in both the public and the private sector.

### Recommended Course Schedule

This recommended course schedule is contingent on the student starting the program in the fall semester and taking 5 classes each semester. If a student starts the program in the spring semester and/or takes less than 5 classes per semester, they will need to adjust their classes accordingly, as most EMHS courses are only offered once per year.

4th semester		Units
